Manufacturers Since 1868

Concrete Interlocking Pavers

NEW! Carbon Accent Pavers (Page 18)

McNear now offers an accent paver in a dramatic new color: Carbon! Available only in our Rectangle (8-1/4" x 5-1/2") shape, this unblended color is McNear's darkest, and can be had in 4 different textures: Cobblestone, Slatestone, Cobblestone Backside, and Slatestone Backside. Accent pavers are typically used as borders, where they add richness to a pavement's design.

NEW! EuroStones (Page 24)

EuroStones are the latest addition to our family of landscape products. Eurostones can be used to build seat walls, planters, firepits, stairs, and more. Their rustic smooth texture is gentle to the touch, and they come in color blends that match or complement the colors of our Concrete Interlocking Pavers.

VERY, VERY OLD!

Brick: The Other Interlocking Paver (Page 22)

They're not for everyone, but for those who want a driveway or patio that is both traditional and dramatic, nothing beats real Fired-Clay Brick! Bricks have been used for roads and pavements for thousands of years, and can be installed today by the same contractors who install Concrete Interlocking Pavers, using the same tools and methods.

Concrete Interlocking Pavers

The Romans perfected interlocking cobblestone pavements over 2000 years ago, and many of their roads are still in good shape. Today, Interlocking Pavers made from modern high-strength concrete are used in the same fashion to create beautiful and durable pavements.

McNear Interlocking Pavers are renowned for their rich color blends and beautiful finishes. Our pavers come in a myriad of colors, shapes, and stone textures, and are complemented by design details such as stair treads, pool copings and 1-Inch thick pavers.

Almost any paved surface could be an opportunity to use McNear Interlocking pavers. Common applications include driveways, patios, pathways, and pool areas. Unlike poured concrete and asphalt pavements, interlocking pavements remain flexible and create a beautiful and crack-proof surface.

Whether you prefer an Old World look or a clean, modern design, McNear Brick and Block has crafted interlocking pavers that fit your personal style.

Slatestone

Charcoal/Gray Slatestone

Slatestone

Slatestone's smooth, layered surface will add the beauty of natural stone to your driveway, patio, or walkway. Use up to four different paver shapes to create either complex or simple designs.

Pavers can be ordered in any of our colors, but for non-stock colors, there may be minimum order requirements and/or set-up charges. Contact our office for a quote.

Please refer to pages 28-29 for information on patterns, sizes and coverage. Permeable Slatestone is also available; see pages 16-17.

Slatestone Backside

Charcoal/Gray Slatestone Backside

Slatestone Backside

For those interested in a flatter paving surface than our Slatestone texture, we have a solution that has been hidden in plain sight: *Slatestone Backside*. This surface is achieved by installing Slatestone pavers upside-down, and exposing their “backsides”. While the Backside surfaces are substantially flat, they are not perfectly so: each paver reflects the subtle scars and wear from our production boards’ many years of use. And these pavers also go through a tumbling process that adds an additional patina of age.

Pavers can be ordered in any of our colors, but for non-stock colors, there may be minimum order requirements and/or set-up charges. Contact our office for a quote.

Please refer to pages 28-29 for information on patterns, sizes and coverage. Permeable Slatestone Backside is also available; see pages 16-17.

Belgian Cobble

Charcoal/Gray Belgian Cobble

Belgian Cobble

You might not live in Europe, but you can replicate that classic Old World appeal for your home. *Belgian Cobble's* timeworn texture radiates warmth and charm, and is available in four different paver sizes.

Please refer to pages 28-29 for information on patterns, sizes and coverage.

Pavers can be ordered in any of our colors, but for non-stock colors, there may be minimum order requirements and/or set-up charges. Contact our office for a quote.

Charcoal / Gray

Charcoal / Tan

Old County Cobblestone

Charcoal/Gray Old County Cobblestone

Old County Cobblestone

Capture the essence of ancient cobble streets curving through scenic villages. *Old County Cobblestone* can add a touch of serenity to any style of architecture whether you prefer a rustic or modern aesthetic.

Please refer to pages 28-29 for information on patterns, sizes and coverage.

Permeable Pavers

Available in Slatestone, Cobblestone and Canyon Cobble

Charcoal/Tan Permeable Cobblestone

Heal the earth while you beautify your home

McNear *Permeable Pavers* are engineered to support the water cycle. They reduce storm drain runoff and filter out water-borne pollutants as rain water is returned to the earth naturally.

Our Permeable Pavers incorporate the same aesthetic and design features as our standard interlocking pavers, using multiple shapes and small gaps to preserve their natural appeal.

- Save money by reducing or eliminating your need for storm drains or catch basins
- Recharge the aquifer and help increase supplies of local drinking water
- Improve the water quality of streams and creeks
- Reduce storm water runoff and flooding problems
- Work in harmony with your home's natural vegetation and landscaping
- Worry less with pavers that are both durable and earth-friendly.

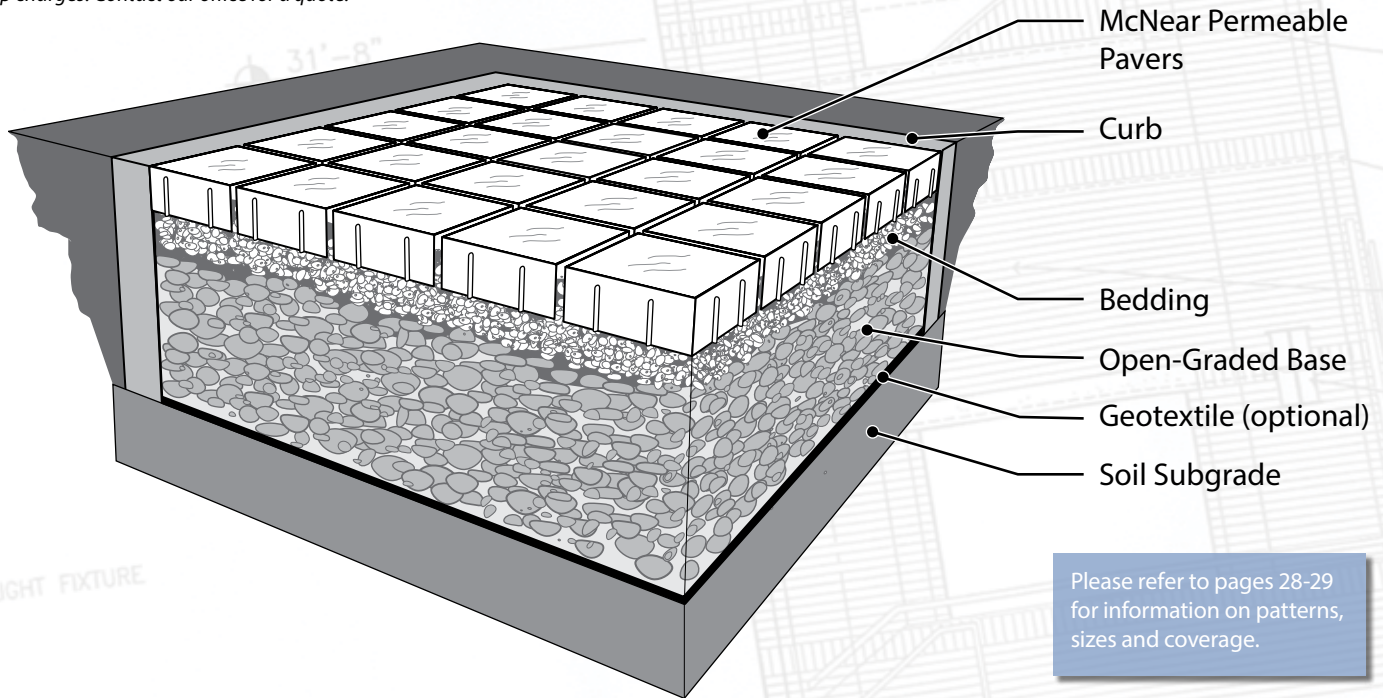

Charcoal/Gray Permeable Cobblestone

Olivine Permeable Cobblestone

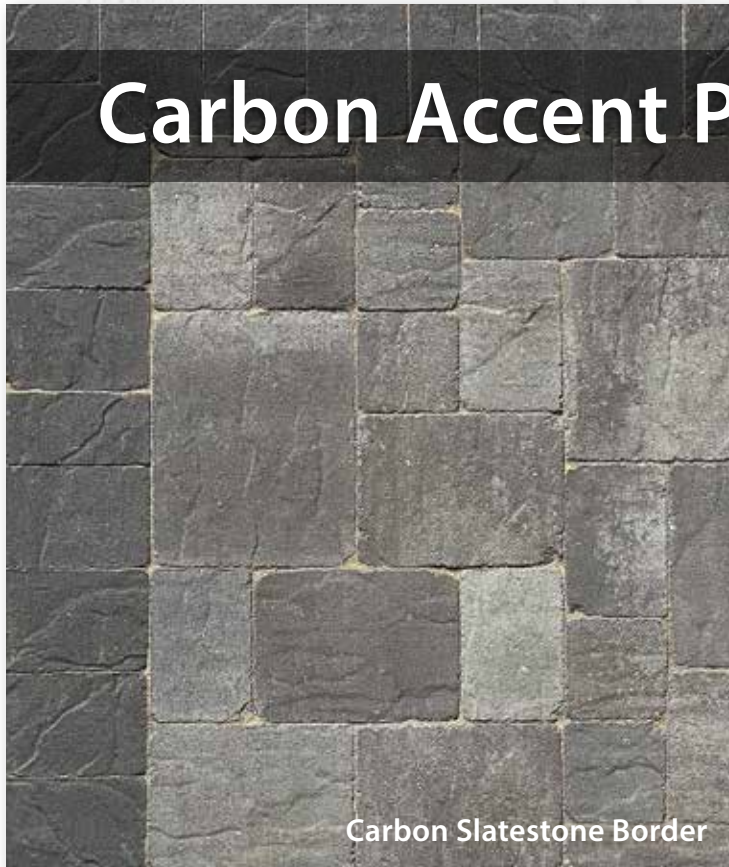

Pavers can be ordered in any of our colors, but for non-stock colors, there may be minimum order requirements and/or set-up charges. Contact our office for a quote.

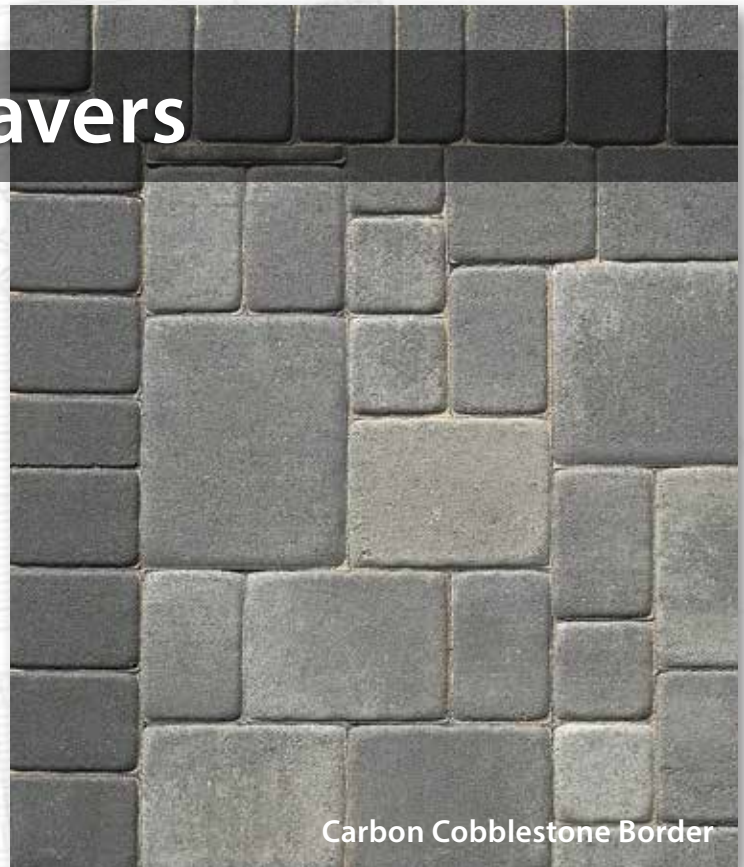

Please refer to pages 28-29 for information on patterns, sizes and coverage.

Permeable Pavers can be ordered in any color of Slatestone, Slatestone Backside, Cobblestone, and Cobblestone Backside, however we do not stock any Permeable Pavers, and minimum orders may apply.

Carbon Accent Pavers

Carbon Slatestone Border

Carbon Cobblestone Border

Carbon Accent Pavers

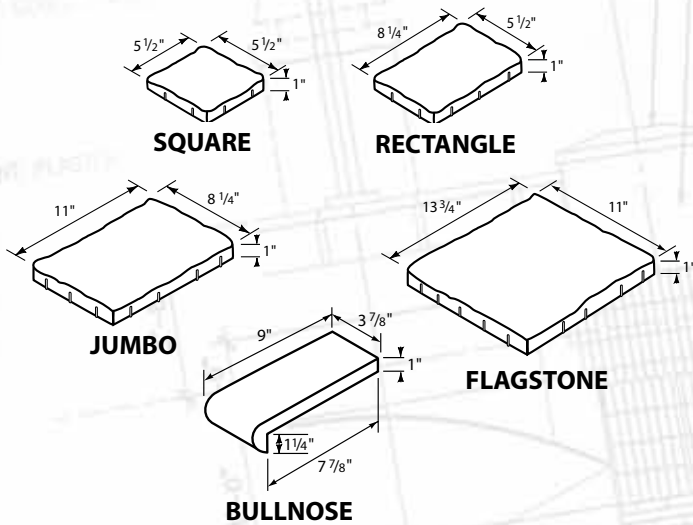

McNear now offers an accent paver in a dramatic new color: Carbon! Available only in our Rectangle (8-1/4 x 5-1/2) shape, this unblended color is McNear's darkest, and can be had in 4 different textures: Cobblestone, Slatestone, Cobblestone Backside, and Slatestone Backside. Accent pavers are typically used as borders, where they add richness to a pavement's design.

1-Inch Pavers

McNear 1-Inch Pavers are ideal for applications where full-depth pavers are impractical. Use them to cover existing porches and stairs, and to face concrete curbs and gutters. McNear 1-Inch Pavers can be installed using either mortar or sand-set techniques.

1-Inch pavers can be ordered in any of our shapes, styles and colors, including Bullnose pieces. Custom thicknesses are also available.

Bullnose Treads & Copings

Bullnose

The ideal finisher to your landscaping—our *Bullnose Pavers* complement any McNear product while adding a polished look to your stairway, driveway, pathway, or swimming pool.

Bullnose pavers are available in Classic and Weathered textures. McNear's Classic texture retains a smooth, contemporary surface. If you prefer rustic landscaping, our Weathered texture is tumbled to create a rough yet charming, time worn feel.

Charcoal / Gray (*Classic*)

Charcoal / Tan (*Weathered*)

Brick: The Other Interlocking Paver

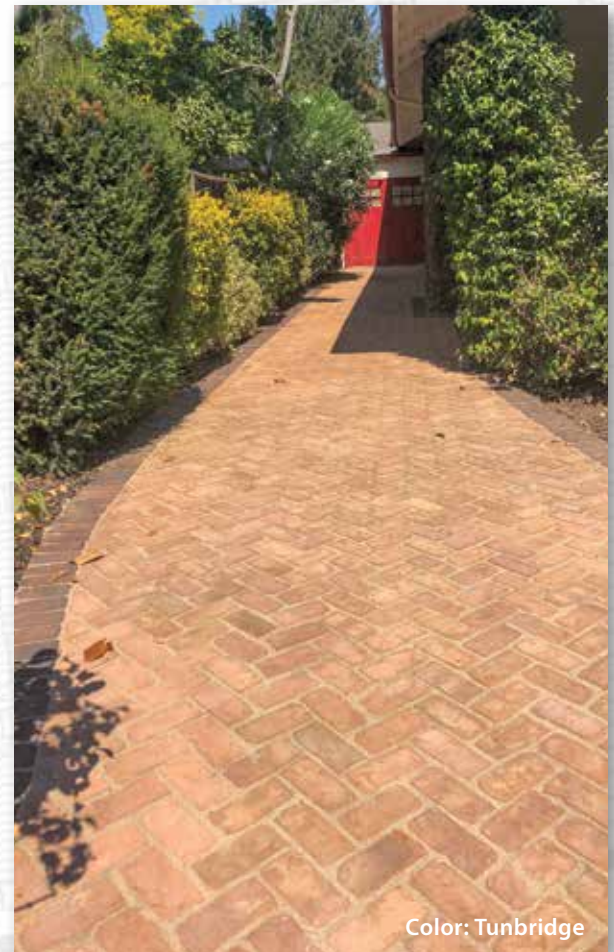

Brick: The Other Interlocking Paver

The use of Concrete Interlocking Pavers has exploded in recent years, and they are now commonplace in driveways and patios almost everywhere. But people overlook the other interlocking paver that has been in use since the days of the Roman empire: Fired Clay Bricks.

Clay Bricks have some significant advantages over concrete pavers: they are available in a broader range of colors, their colors are far more vibrant, and their colors can be richly variegated.

The Bricks of McNear's Sandmold Series and Old California Series are particularly well-suited for use in interlocking pavements. Their relieved edges and rustic nature allows them to be easily installed without concerns about chipping. The same contractors who install Concrete Interlocking Pavers, can install McNear's Clay Bricks, using the same tools and methods. For driveways, use our Standard Solid size Bricks, which are 2-7/16" thick. Our Split size Bricks (1-1/4" thick) are great for use as interlocking pavers in pedestrian areas, although they should not be used for areas with vehicular traffic.

If you want something a little out of the ordinary, or if your project has an historic or Old World feel, then consider using one of McNear's many brick choices as your interlocking pavement.

EuroStone Landscape Blocks

EuroStones

EuroStones are modular concrete landscaping blocks, designed for building common outdoor structures such as seating walls, steps and stairs, garden planters, columns, fire pits, and more. Using modern high-strength concrete adhesives, EuroStones create beautiful and durable landscape feature in a fraction of the time needed for other construction methods, and at a fraction of the cost.

These multicolored blocks are put through McNear's unique aging process, which replicates the chipped edges, broken corners and general wear of ancient stone walls, and which gives them a smooth, but rusticated texture that is gentle to the touch. EuroStones are available in 8 colors that correspond to McNear's Interlocking Paver colors: Carbon, Charcoal/Gray, Charcoal/Tan, Lassen, Napa, Olivine, Tierra, and Yosemite.

Composition & Manufacture: McNear pavers are manufactured from a high strength concrete mix. They conform to ASTM C-936 and have a minimum average compressive strength of 8,000 PSI.

Visit www.mcnear.com to see our newest products and colors.

Beauty and Sustainability

When we opened our doors in 1868, our workers made bricks by hand and used wheelbarrows to load them onto scow schooners for delivery to the many small ports lining San Francisco Bay.

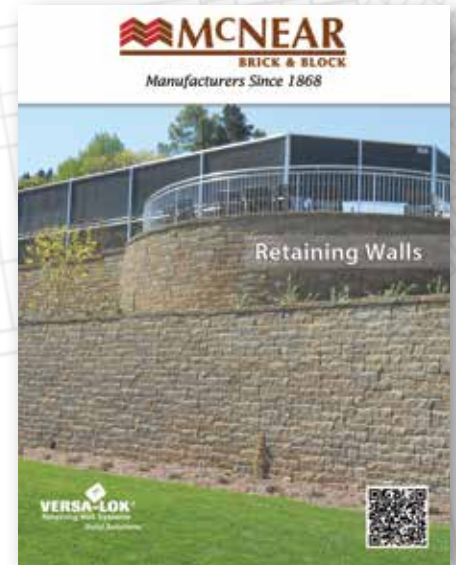

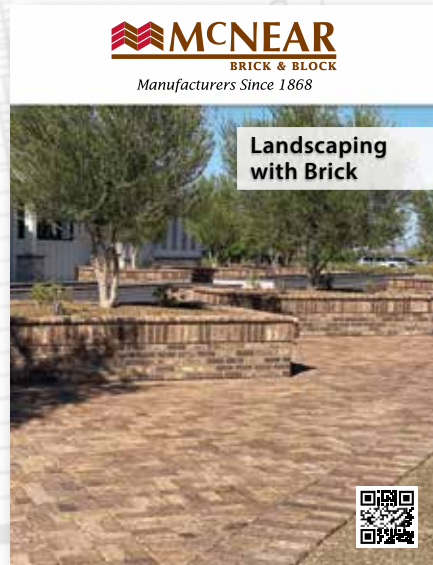

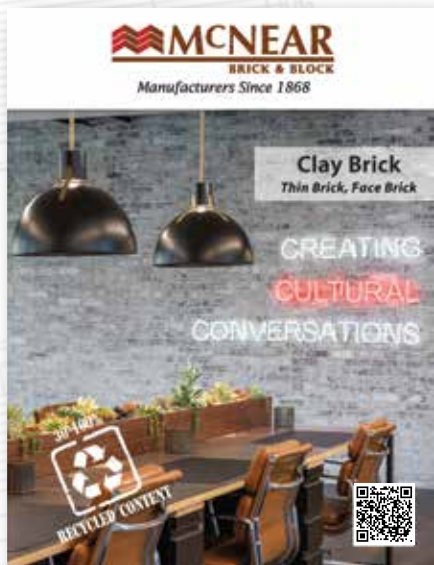

The days of horse and sail are long gone, but the landmarks built with our products, such as Ghirardelli Square and the Golden Gate Bridge, remain.

Today we manufacture many more products than the clay bricks we started with. McNear is now a leading regional manufacturer of Interlocking Pavers, as well as the VERSA-LOK® family of Segmental Retaining Walls.
